PROFILE SUMMARY

Software Engineer with 3+ years of experience building scalable mobile and backend systems. Led backend teams and shipped high-performance Flutter apps serving 1,000+ users across multiple countries. Specialized in mobile architecture (BLoC, offline-first), API integrations, and cloud deployment on AWS.

PROFESSIONAL EXPERIENCE

Back-end Developer Project Lead — NextGen Solutions

07/2025 – Present

Dallas, USA (Remote)

- Led backend development lifecycle from architecture to deployment for a critical platform
- Architected a secure, scalable deployment stack using AWS Cognito, App Runner, ECR, and Docker

Flutter Developer — A2SV

11/2023 – Present

Addis Ababa, Ethiopia

- Architected and launched SkillBridge educational platform using Flutter + Firebase, scaling to 1,000+ users with offline support and AI-powered feedback
- Implemented BLoC state management for robust, testable architecture
- Engineered hybrid exam architecture (local vs. backend evaluation) for country-specific scoring logic (Ethiopia & Rwanda), reducing data response time by 60%

API Integration & Data Solutions Specialist — ReiSearch

12/2024 – 04/2025

Wyoming, USA (Remote)

- Spearheaded integration of GoHighLevel CRM and Home Depot website, automating property uploads
- Reduced manual data entry by 90% and improved lead generation by 30%

AI Developer — iCog-Labs

08/2024 – 12/2024

Addis Ababa, Ethiopia

- Built RAG-based search engines and Neo4j recommendation system, improving retrieval accuracy by 40%
- Enhanced a wellness chatbot, increasing user retention by 15%

PROJECTS

SkillBridge — Educational Platform (Flutter + Firebase)

- Cross-platform mobile app with offline-first architecture, serving 1,000+ users
- Real-time sync, push notifications, AI-generated feedback on student submissions

AI-Powered Multilingual Virtual Tour Guide

- Python (Flask) web application with 360° virtual tours of Ethiopian destinations
- Multilingual voice interaction via Google Cloud APIs and fine-tuned HuggingFace translation model

EDUCATION

B.S. in Software Engineering and Computing Technologies (AI Major)

07/2025

Addis Ababa University

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Web & Mobile Development, NLP, Machine Learning, Deep Learning

SKILLS

Languages:	Dart (Advanced), Python (Advanced), Java (Advanced), JavaScript (Intermediate)
Mobile:	Flutter, BLoC, Firebase, Offline-First Architecture, Push Notifications
Backend:	Spring Boot, Django, Flask, FastAPI, Node.js, REST APIs
Cloud/DevOps:	AWS (Cognito, App Runner, ECR), Docker, Git, CI/CD
Databases:	PostgreSQL, MongoDB, DynamoDB, Firebase Firestore
Integrations:	GoHighLevel, Google Cloud APIs, Third-party API design
