

Program Details

10 Academy is a program designed to identify, train, and launch the careers of some of Africa's highest potential young people.

TRP intensive training in **AI Agent Engineering, AI Evaluation Engineering, and Forward Deployed Engineering Training** was undertaken and successfully completed from February 16, 2026, to May 8, 2026. This training was conducted full-time remotely, with study and work time 60+ hours per week.

The training provided graduates with the skills necessary to be job-ready AI Agent Engineer, AI Evaluation Engineer, and Forward Deployed Engineer including:

AI Agent Engineering

- Agent frameworks and Protocols
 - LangGraph
 - MCP
- Multi-agent systems
 - Hierarchical state graphs
 - Parallel agent orchestration
 - Conflict resolution synthesis
- Context engineering
 - Layered agent context
 - LLM context injection
 - Knowledge base construction
- Output discipline
 - Structured output enforcement
 - Prompt and output validation
 - LLM-as-judge
 - Rubric-driven evaluation

Programming & DevOps

- Advanced Python
- Advanced SQL/NoSQL
 - PostgreSQL, DuckDB, SQLite, MongoDB
- AST parsing
 - tree-sitter, sqlglot
- Docker
- Git and GitHub workflows
- Unit testing
- Agent observability
 - Langfuse/Langsmith

Knowledge Infrastructure

- Document Intelligence
 - OCR
 - Multi-strategy routing
 - Semantic chunking, RAG indexing
 - Bounding-box provenance
 - PageIndex navigation, Table extraction
- PDF parsing libraries
 - pdfplumber, pymupdf, Marker
 - MinerU, Docling
- Codebase Archaeology
 - Multi-language AST parsing
 - Pipeline lineage parsing
 - Data lineage graphs (NetworkX)
 - Blast radius analysis
 - PageRank on dependency graphs
 - Git velocity analysis
 - Code quality signals

Multi-System Agents

- Multi-database integration
 - Text-to-SQL
 - Cross-DB entity resolution
 - Self-correcting execution
- Tool design
 - Tool scoping for agents
 - MCP Tool & Resource design
- Multi-channel orchestration
 - Outreach APIs (email, SMS, CRM, calendar)
- Web automation (Playwright)

Evaluation & Model Training

- Evaluation harness design
 - DataAgentBench
 - tau-2-Bench
- Dataset construction
 - Synthetic data generation
 - Multi-LLM synthesis routing
 - Contamination prevention
- LLM judge calibration
- Fine-tuning techniques
 - PEFT (Parameter-Efficient FT)
 - LoRA (Low-Rank Adaptation)
 - Preference tuning (DPO, SimPO, ORPO)
- Training infrastructure
 - Unsloth, HuggingFace
- Evaluation discipline
 - Held-out evaluation, Cost-quality analysis

Career & Professional Skills

- Communication
 - Reflection writing
 - Async communication
 - Standup communication
 - Technical presentation
 - Discussion participation
 - Stakeholder translation
- Team Collaboration
- AI Development Lifecycle (AI-DLC)

Assessment was done through daily standup meetings, presentations and assessment of 9 project assignments completed over the 12-week long training period.

Trainees graduating were among the top 3% of all talent that applied for the program and completed an estimated 700+ hours of Agentic AI Agent Engineering, AI Evaluation Engineering, and Forward Deployed Engineering work as part of their training. Based on their performance, we recommend them highly.

For any questions on the training or to verify this certificate, please contact train@10academy.org
