Profile Summary

Software & AI Engineer with 3+ years of experience architecting scalable full-stack solutions. Proven track record of leading backend teams and building high-performance mobile apps serving **1,000+ users**. Expert in **Flutter, Spring Boot, and Python**, with deep specialization in deploying AI models (NLP/CV) and optimizing cloud infrastructure on **AWS**.

Professional Experience

- | | |
|--|--|
| Back-end Developer Project Lead, NextGen Solutions | 07/2025 – Present
Dallas, USA (Remote) |
| <ul style="list-style-type: none">Led the backend development lifecycle, from architecture to deployment, for a critical platform.Architected and implemented a secure and scalable deployment stack using AWS Cognito, AWS App Runner, ECR, and Docker. | |
| Flutter Developer, A2SV ✍ | 11/2023 – Present
Addis Ababa, Ethiopia |
| <ul style="list-style-type: none">Architected and launched the SkillBridge educational platform using Flutter and Firebase, scaling to 1,000+ users with offline support and AI-feedback, utilizing BLoC for robust state management.Engineered a hybrid exam architecture (local vs. backend evaluation) to handle country-specific scoring logic for Ethiopia and Rwanda, reducing data response time by 60%. | |
| API Integration and Data Solutions Specialist, Calldi ✍ | 12/2024 – 04/2025
Wyoming, USA (Remote) |
| <ul style="list-style-type: none">Spearheaded the integration of GoHighLevel CRM and the Home Depot website, automating property uploads.Reduced manual data entry by 90% and improved lead generation by 30%. | |
| AI Developer, iCog-Labs ✍ | 08/2024 – 12/2024
Addis Ababa, Ethiopia |
| <ul style="list-style-type: none">Built RAG-based search engines and a Neo4j recommendation system, improving information retrieval accuracy by 40%.Enhanced a wellness chatbot, increasing user retention by 15%. | |
| AI Researcher, Ethiopian Artificial Intelligence Institute ✍ | 03/2024 – 06/2024
Addis Ababa, Ethiopia |
| <ul style="list-style-type: none">Refined facial recognition systems, improving identification accuracy by 10%.Advanced Amharic NLP models, reducing word error rate by 12% for conversational AI. | |

Projects

- | | |
|---|-------------------|
| AI-Powered Multilingual Virtual Tour Guide ✍ | 10/2024 – 06/2025 |
| <ul style="list-style-type: none">Developed a Python (Flask) web application with 360° virtual tours of Ethiopian destinations.Implemented multilingual voice interaction by integrating Google Cloud APIs and fine-tuning a Hugging Face translation model. | |

Education

- | | |
|---|----------------------------------|
| B.S. in Software Engineering and Computing Technologies (AI Major),
Addis Ababa University ✍ | 07/2025
Addis Ababa, Ethiopia |
| <ul style="list-style-type: none">Relevant Coursework: Data Structures & Algorithms, Operating Systems, Web & Mobile Development, Natural Language Processing, Machine Learning, Deep Learning. | |

Skills

Programming Languages: Python (Advanced), Dart (Advanced), Java (Advanced), JavaScript (Intermediate)
Frameworks/Libraries: Flutter, Spring-boot, Django, Flask, FastAPI, React, Node.js, TensorFlow, PyTorch, OpenCV
Others: Docker, Git, CI/CD, Data Structures, Algorithms, Machine Learning, AWS, PostgreSQL, MongoDB, Neo4j, DynamoDB, GoHighLevel
